

1. Open the sunumbrella halfway
2. Remove the screw and hang on to it
3. Open the velchro strip
4. Remove the pockets gently from the arms of the frame
5. Remove the top
6. Remove the old canopy from the frame

Apply new canopy

1. Place the new (PEP Trade) canopy over the umbrella frame
2. Place the top back on the frame
3. Make a small hole in the canopy where the screw is placed back
4. Place back the screw
5. Pull the pockets (gently) over the arms
6. Open the frame fully and turn the handle to open the canopy completely

ATTENTION!

When the canopy does not open completely we advise you not to force it. There are two solutions:

1. Do not turn the canopy fully up or
2. Cut off a small piece of the corner arms of the frame

TIP* You will achieve the best result (without fold or crease) when ironing the canopy before applying. Position "cotton" on iron!

Have a great summer
The PEP Trade team
